Scan Tools - Read codes, live data and other manufacturer-specific tests		
1984 - 1995	GM OBD I cars and light trucks*•	SUPER AutoScanner™ CP9145 & GM OBD I Cable CP9127 or SUPER AutoScanner™ Kit CP9150
1984 - 1995	Ford OBD I cars and light trucks*	SUPER AutoScanner CP9145 & Ford OBD I cable CP9128 or SUPER AutoScanner Kit CP9150
1989 - 1995	Chrysler OBD I cars and light trucks*	SUPER AutoScanner CP9145 & Chrysler OBD I cable CP9129 or SUPER AutoScanner Kit CP9150
1996 and newer	All makes that are OBD II Compliant	SUPER AutoScanner CP9145 or SUPER AutoScanner Kit CP9150
1984 and newer	Domestic makes OBD I/OBD II Compliant*	SUPER AutoScanner Kit CP9150

*Domestic built engines

❖Excludes vehicles equipped with Mazda Engine Control Systems (MECS)

•Excludes Cadillac DFI

A **Code Scanner** “reads” diagnostic trouble codes generated by the vehicle’s OBD system. Codes are displayed on the vehicle’s dashboard and/or identified through audio prompts. It is important to select a Code Scanner designed for use with your vehicle make and model.

The Actron PocketScan Code Reader CP9125 and OBD II AutoScanner CP9135 read and erase OBD II generic codes. AutoScanner CP9135 also provides code definitions on its screen. They both are for use on all OBD II-compliant vehicles.

A **Scan Tool** can be used to read and erase trouble codes, display live diagnostic data, and perform other tests allowed by the vehicle maker. Actron’s SUPER AutoScanner Kit CP9150 is an OBD II Scan Tool; it reads both OBD II generic and manufacturer specific codes and includes cables that allow it to read trouble codes on OBD I (1984 - 1995) domestic vehicles. These cables are optional for the SUPER AutoScanner CP9145.
