FOR IMMEDIATE RELEASE

### **New Full Featured OBD II AUTOSCANNER® Now Available from Actron®**

CLEVELAND, OH, November 1, 2005 -- Actron®, a leading manufacturer of automotive diagnostic tools, introduces the next generation of Actron Scan Tools: the new OBD II AutoScanner® (Part Number CP9175). The OBD II AutoScanner allows users to view data in English, Spanish or French. This new code reader from Actron provides on-screen definitions of generic OBD II and manufacturer specific codes.

With more functions than other code readers available in the automotive aftermarket at comparable cost, the OBD II AutoScanner is Internet updatable, and it displays freeze frame data, which provides a "snapshot" of the vehicle's operating conditions at the time of the fault. The OBD II AutoScanner can read and erase trouble codes, review data off-vehicle, and reset check engine light.

As check-engine lights continue to play an increased role in emissions system testing, Actron's OBD II AutoScanner responds with I/M monitors that provide readiness test status for emissions testing. Users can also check MIL status.

tools is known for,” explains Shilpi Biswas, Director – Marketing & Product Development Aftermarket Diagnostic Group for Actron. “And, our new OBD II AutoScanner has unmatched functionality when compared with our competitors’ products.”

The OBD II AutoScanner communicates with all cars and light trucks sold in the U.S. market since 1996. The unit comes with a six-foot cable. Accessories available for use with the OBD II AutoScanner include a CD with a library of over 10,000 DTCs (Diagnostic Trouble Codes) and definitions.

For additional information regarding the OBD II AutoScanner and other Actron precision electronic solutions, contact your Actron representative or call (800) 228-7667. Product information is also available online at [www.actron.com](http://www.actron.com).

Actron, a business unit of SPX Service Solutions, continues its 40-year tradition as a leading manufacturer of cost-effective, high-performance automotive diagnostic and test equipment. Actron’s innovative products are the tools of choice for do-it-yourselfers.

SPX Service Solutions designs, manufactures and markets a fully integrated family of global brands providing specialty service tools, advanced diagnostic and shop equipment, inspection and gauging systems, training and technical information for vehicle servicing and maintenance.
